

# Inpatient Surgery: Hospital Stay

# Inpatient Surgery

---

## ► Hospital Stay

- After your surgery, you will come out to the recovery room.
- Your nurse will monitor your vital signs, incision site, pain and overall comfort
- Once you have begun to wake up from anesthesia and are comfortable, you will be transitioned out to a room in the hospital

# Inpatient Surgery

---

- ▶ Hospital Stay
  - The nursing care team will be continually checking your vital signs, pain and comfort
  - The nursing staff will get you out of bed and to the bathroom when you are ready
  - You will see physical therapy the following morning

# Inpatient Surgery

## ► Pain

- Make sure that you let your nurse know when you start having pain
- The goal is to keep your pain at a 5/10 or below
